Franchising 101:

1. **What is a franchise?** Franchising is a business relationship in which a franchisor grants a franchisee the license to operate a business using the franchisor’s concept, brand, and operating system.
2. **Why become a franchisee?** It gives entrepreneurs an opportunity to achieve success as a small business owner with the support and assistance of a franchisor. For some, it’s a way start their careers and for others, it may be a second career or retirement investment.
3. **How to discover franchise opportunities?** Franchising provides opportunities in a range of industries. When you explore our online directory, lookforafranchise.ca, you access the nearly 50 different franchise categories within the CFA’s franchise system membership.

Franchising is For Everyone:

When people think about franchising, their first thought is often of fast food. What they may not realize is that franchising can be found in nearly every industry. This is the power of the franchise business model – any business that can be exactly replicated in a new location can be a franchise! As the chart below shows, franchising provides opportunities in a range of industries.
